

Automatic Doors

Over the years BID Group have acquired the knowledge and the understanding on the repair and maintenance of leading automatic door products.

With so many variations of automatic doors in operation, BID Group has invested in stocking a universal operating system kit. The system is designed to be compatible with the majority of market leading operators, enabling BID Group to replace un-repairable or absolute operators. The kit can suit any make or model of automatic door and are a cost effective solution to expensive auto door repairs.

With the Disability Discrimination Act (DDA) now playing an important role in the function of how automatic doors should operate, BID Group are able to help customers identify and recommend the right equipment to ensure the doors are operating in accordance with the current health and safety regulations.

Benefits

- Repair and service a wide range of makes and models
- An independent provider
- Universal replacement kit
- Specialist Auto door engineers

Automatic Door Specification
